Hridey Marwah

Delhi, India | hrideymarwah2907@gmail.com | Portfolio | GitHub | LinkedIn

Profile

First-year Computer Science (AI) student building full-stack and AI-powered applications across healthcare, LegalTech, and EdTech domains. Hackathon finalist (IIIT Gwalior) and active JAX open-source contributor, focused on developing scalable systems, solving real-world problems, and building production-ready products.

Education

Newton School of Technology 2025–2029
B.Tech in Computer Science & Engineering (AI)
Rishihood University, Sonipat

Technical Skills

Languages: Python, JavaScript, HTML, CSS
Frameworks: React.js, Next.js, Tailwind CSS, Framer Motion
Tools: Git, GitHub, VS Code, Canva
Backend: Supabase, REST APIs
AI/ML: JAX (Contributor), NumPy, OCR, Computer Vision

Open Source

JAX-ML Contributor

- Contributing to Google's high-performance numerical computing framework
- Understanding large-scale codebases and performance-oriented systems
- Exploring optimization techniques in ML pipelines

Leadership

Tech Head — Sports Club

- Led technical infrastructure for Hanumaant Sports Fest and Damru Fest
- Managed execution and coordination of multi-team college-level events
- Handled digital systems, communication flow, and event operations

Achievements

- Hackathon Finalist — IIIT Gwalior (InfoTsav'25)
- Participated in IISc Bangalore Hackathon
- GSoC 2026 Applicant (Open Source Program)

Interests

Full-Stack Systems, Applied AI in Real-World Problems, SaaS Product Development, Startup Ecosystems, Scalable System Design

Projects

Developer Portfolio

Next.js, Tailwind, Framer Motion, Supabase
github.com/hrideymarwah15/portfolio-v2

- Built a modern portfolio with sub-2s load time and optimized Core Web Vitals
- Designed modular UI system with reusable components and scalable architecture
- Integrated smooth animations using Framer Motion without performance loss
- Achieved high Lighthouse performance score with fully responsive design
- Serves as a live demonstration of frontend engineering and personal branding

Medical OCR System

Python, OpenCV, AI
github.com/hrideymarwah15/Aushadhi$_OCR$

- Developed OCR pipeline for digitizing medical prescriptions and records
- Applied preprocessing techniques (noise reduction, thresholding) to improve accuracy
- Integrated AI-based corrections to enhance extraction reliability
- Converted unstructured healthcare data into structured datasets

Legal Issue Management Platform

Next.js, Supabase
github.com/hrideymarwah15/v0-legal-issue-reporting

- Built full-stack LegalTech platform for issue tracking and reporting workflows
- Implemented role-based access control and structured case lifecycle handling
- Designed backend workflows and database schema for scalable compliance systems
- Integrated real-time database operations and authentication using Supabase

SaaS Life Tracker

React, State Management

- Developed all-in-one productivity system for tasks, notes, and scheduling
- Managed complex relational state across multiple features and workflows
- Demonstrates SaaS product thinking and scalable system design principles

Study Assistant (EdTech)

React.js
github.com/hrideymarwah15/StudyAssistant

- Built productivity-focused application for coursework and task management
- Designed intuitive UI for daily usage and workflow optimization
